

Cooper

Cooper Elevators™

.. a brand with finest designs & impeccable installations !

ADVANCED MACHINE ROOM LESS ELEVATOR:

- Reduced space for components leaving usable building area
- Suitable for Mid-High Rise buildings upto 60 meters height
- Energy-efficient, Hassle-free & Easy Maintenance
- High speed capability upto 2 meters per second

Cooper Elevators™

With best-in-industry ride-quality, safety and durability through the best in international technology and engineering, Cooper Elevators is your natural partner of choice for the finest designs & impeccable installations.

With over a decade of quality experience in manufacturing, installation and commissioning of world-class elevators, the company is Head Quartered in Chennai with operations in Bengaluru, Vijayawada, Coimbatore & Trichy with expansion into Pune, Mysore & Hyderabad on the cards in the near future.

Cooper Elevators' strong in-house fabrication and assembly facilities include state-of-the-art infrastructure and high quality design facilities.

Our 12,000 sqft facility seamlessly integrates manufacturing, R & D and warehouse under one roof.

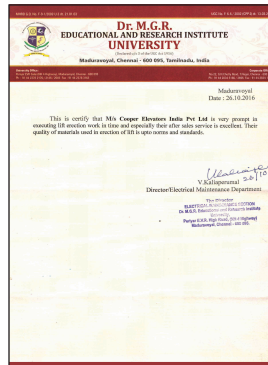

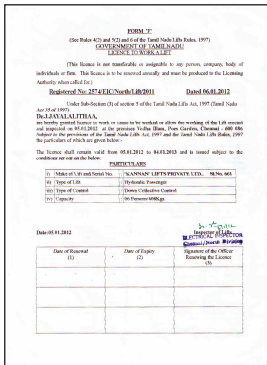

With rock solid credibility built over thousands of high quality installations for prestigious clients, Cooper Elevators offers an unmatched range of products, accessories and 1 year of free maintenance on every installation.

Our USP is Quality, Delivery & Service.

Whatever the size, application or technical constraints in your project, Cooper Elevators has the perfect solution for you !

SOME OF OUR IMPRESSED CUSTOMERS

Ceebros, S & S Foundation, K. G. Foundation, Russel Foundation, AKM Rigid Developer, Vishwakarma, Harmony Homes, Harini Builders, C. R. Raju Architects, P. S. P. Architects, M.G.R. University, Absolute Barbeque, Adyar Ananda Bahwan, Tanishq, Rasi Silks ...to mention a few.

An Architect-way

A visual treat & an awe-inspired experience !

The ideal choice - While Dr. M.G.R. Educational and Research Institute continues to provide solutions to 21st century problems through education and technology, Cooper Elevators is proud to have customized its high quality, world-class, feature-laden elevators to add value to the infrastructure of the institution.

The elevators installed in the campus are testimony to the fact that Cooper elevators are an ideal choice for mid high-rise projects. The installation takes the image of the building to an unimaginable level in terms of appearance, convenience and performance.

MRL Lift machine fixed on the guide rails,
All static & Dynamic loads will be transferred to the pit

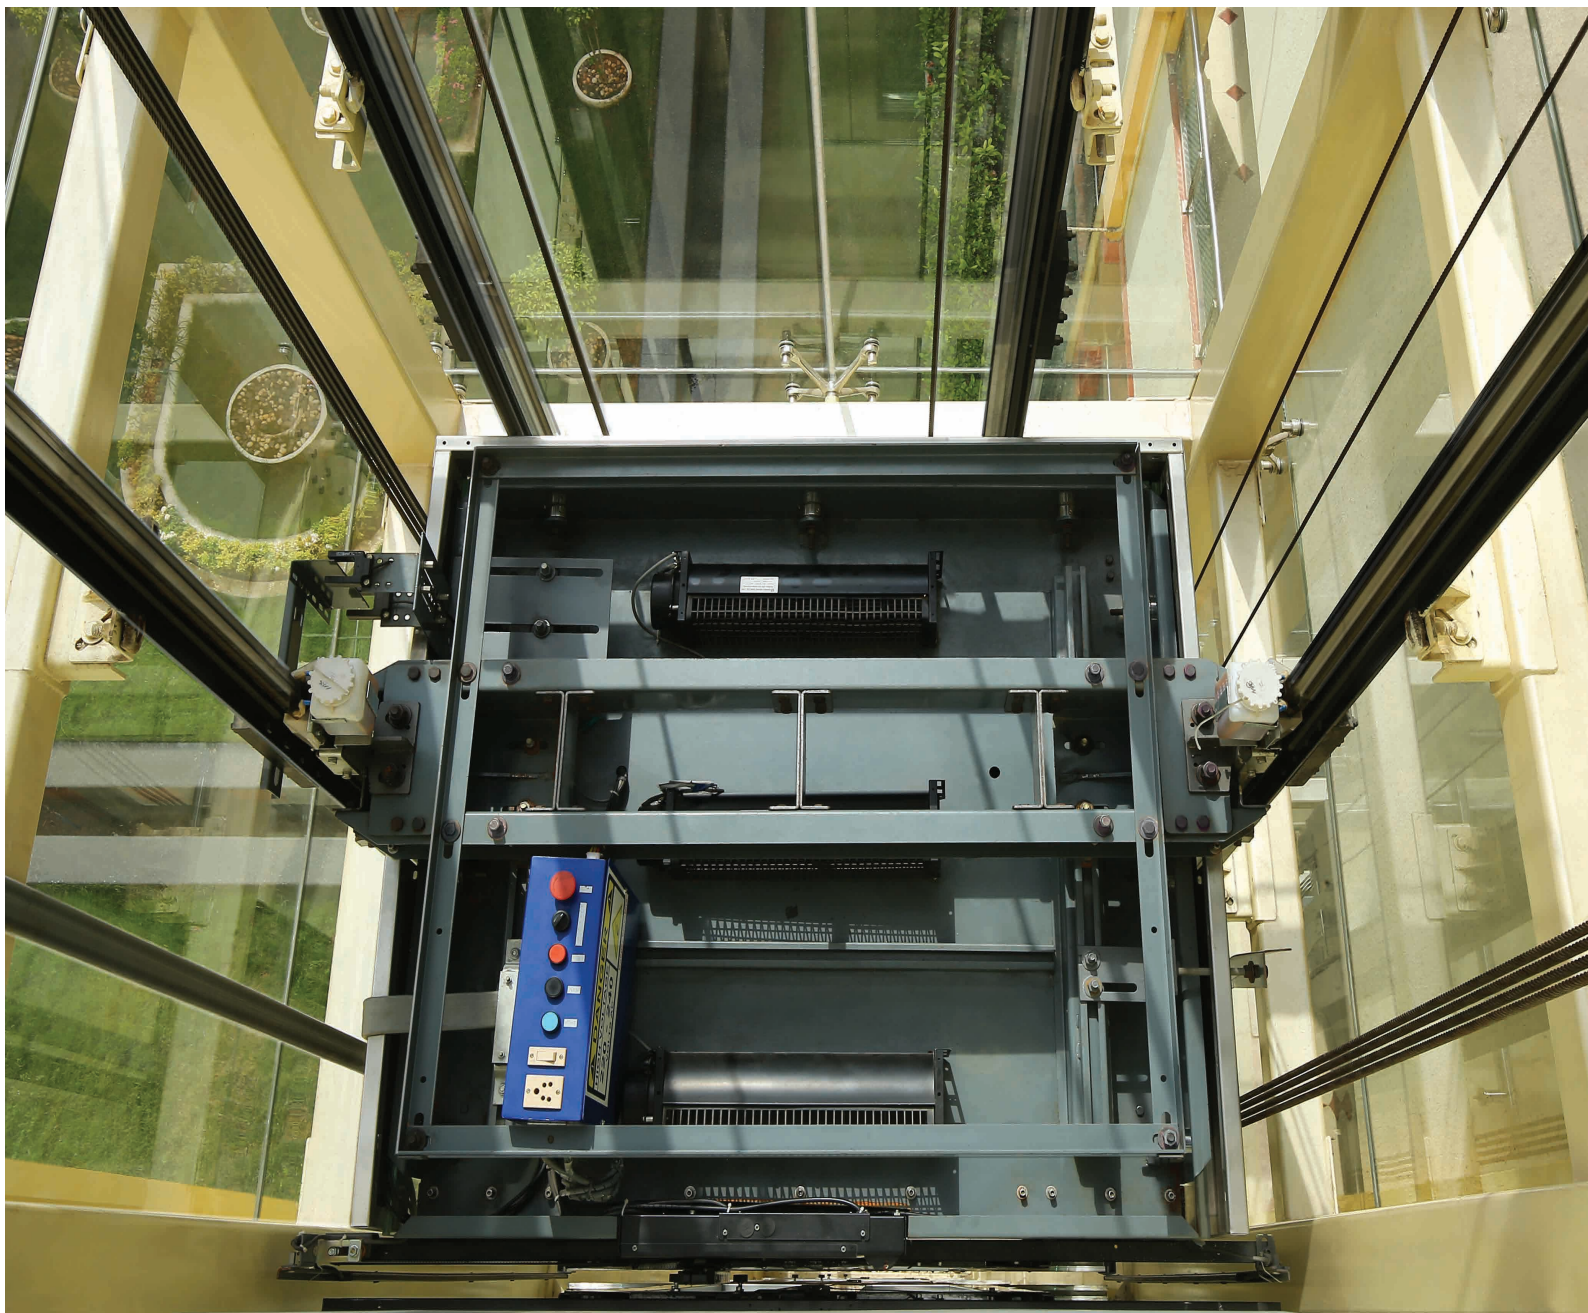

Designed to inspire

Contemporary designs and new age technology have been the top-notch priorities when Cooper Elevators set out to create the blue print for the elevator system for the institution's campus at Dr. M.G.R. Educational and Research Institute. Cooper has successfully added value to the infrastructure by installing advance machine room less elevators (MRL), saving a lot of space for other components.

Lifts without machine room are one of the most applauded improvements in the elevator manufacturing sectors. The elevator installations inside this institution are not only a visual treat to look at but also leave the user with an awe-inspired experience.

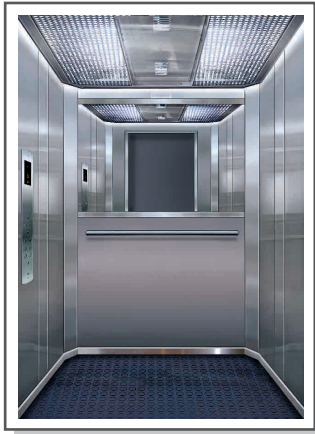

Saving Energy

Imagine having an elevator system which consumes a significant amount of the electricity supplied to your building and premises? It would definitely not be a sustainable choice in the long run. Cooper Elevators always ensures to keep this concern of the end consumer in mind while designing its contemporary products.

That is why, we have designed an elevator system for the institution that is not only energy efficient, but also provides easy and hassle-free maintenance service.

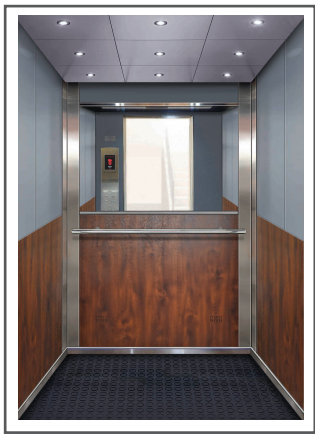

Lift Dimension

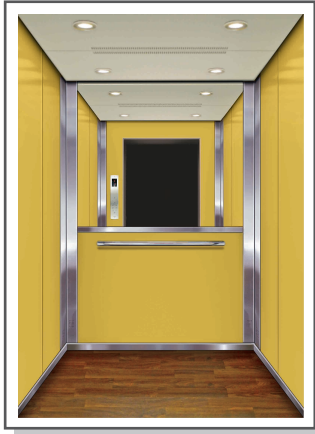

4 Passenger (272 Kg) Cabin Size					
No	Car Width	Car Depth	Well Width	Well Depth	Door Opening
1	1100	700	1750	1300	700/800
2	950	850	1400	1500	700

5 Passenger (340 Kg) Cabin Size					
No	Car Width	Car Depth	Well Width	Well Depth	Door Opening
